

# CANADIANS ARE GRAPPLING WITH AFFORDABILITY

The federal government can make life more affordable by reducing payroll taxes.

**LOWER THE EI PREMIUM RATE**

**TO 1.58% FROM THE CURRENT RATE OF 1.66%**

This small but significant change will save Canadian jobs, provide critical relief for businesses, and ensure that local enterprises remain open, contributing to the vitality of communities across the country.

Canadians are struggling with affordability. Reducing payroll taxes will help employees and preserve jobs.

**THE TIME FOR ACTION IS NOW.**

By reducing EI premiums, businesses owners will reinvest, innovate, and create more jobs. Employees will see more from their paycheck.

A reduction in EI premiums is a practical and immediate step government can take now.

This move returns an estimated \$1.7B to the economy – to struggling families and workers. For a two-income family trying to make ends meet that would mean an extra \$100 for school clothes or a tank of gas.

**BE A CHAMPION WITH YOUR CAUCUS FOR GOVERNMENT ACTION IN SEPTEMBER.**
